

Fashion doll, Barbie® fan, and Steffie collector Alison Rasmussen shares her eclectic collection with untraditional color photographs in this fun reference book. While not a professional photographer, the author includes many candid photos of various dolls created between 1971 and 2011, as well as a reference list of Steffie-faced dolls manufactured by Mattel and its licensed affiliates. The Out of the Box series is a casual visual reference for doll collectors and fans of the Fashion Doll Review blog. An affordable paperback collection, this series examines specific doll styles, sculpts, and collections in color photographs and descriptions. Fashion dolls are styled and dressed according to the book's theme. Resources and references are included.
